

Amjad Nazar

Artificial Intelligence & Machine Learning Engineer

Email: amgadnazar11@gmail.com

Contact: +201131002834

Address: Cairo, Egypt

LinkedIn: www.linkedin.com/in/amjad-nazar

Portfolio: <https://amgadnazar.github.io/>

PROFESSIONAL SUMMARY

Applied Artificial Intelligence Engineer with hands-on experience building production-oriented AI applications that combine Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), and scalable backend systems.

Specialized in designing intelligent software using Python, FastAPI, PostgreSQL, and cloud APIs, with experience developing conversational AI, AI-powered healthcare platforms, machine learning models, and modern RESTful services.

Passionate about shipping reliable AI products, solving complex engineering problems, and building software that delivers measurable real-world impact.

CORE STRENGTHS

Applied Artificial Intelligence, Generative AI, Machine Learning, LLM Applications, Retrieval-Augmented Generation (RAG), Natural Language Processing, Backend Engineering, REST API Design, System Architecture, AI Product Development, Software Engineering, Technical Problem Solving.

TECHNICAL SKILLS

AI & Machine Learning: Python, Machine Learning, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Google Gemini API, Natural Language Processing, Prompt Engineering, Intent Classification, Conversational AI.

Backend: FastAPI, REST APIs, HTTPX, API Integration, Modular Architecture

Databases: PostgreSQL, Supabase, Firebase.

Data Science: Pandas, NumPy, Scikit-learn, Statistical Analysis, Data Visualization.

Programming Languages: Python, SQL, Java, JavaScript, HTML, CSS, React Native, Node.js.

Developer Tools: Git, GitHub, VS Code, Postman, Jupyter Notebook.

PROFESSIONAL EXPERIENCE

Information Technology Trainee

Bank of Khartoum

MAR 2023 – June 2023

- Assisted in maintaining enterprise IT infrastructure and internal systems.
 - Supported database administration and technical troubleshooting.
 - Collaborated with IT staff to improve operational efficiency.
 - Contributed to technical documentation and system maintenance activities.
-

FEATURED PROJECTS

AI Medical Assistant Platform

Production-ready Healthcare AI Platform

Python • FastAPI • Google Gemini • PostgreSQL • Supabase • RAG • WhatsApp Business Cloud API

↪ [GitHub Repository](#)

Designed and developed a production-oriented AI platform that enables healthcare providers to automate patient communication through intelligent WhatsApp conversations.

Highlights

- Designed a scalable modular backend architecture.
 - Integrated Google Gemini for conversational AI.
 - Built a Retrieval-Augmented Generation pipeline.
 - Implemented conversation memory and patient profile extraction.
 - Developed an intent-driven workflow engine.
 - Integrated Meta WhatsApp Business Cloud API.
 - Designed business-rule based appointment workflows.
 - Reduced unnecessary LLM calls through intelligent routing.
 - Designed the platform for future multi-tenant SaaS deployment.
-

Hospital Administration Dashboard

React • TypeScript • Tailwind CSS • FastAPI

Designed a modern SaaS dashboard for managing patients, appointments, healthcare providers, AI conversations, analytics, and operational workflows.

Toxic Comment Classification

Python • Scikit-learn • Natural Language Processing

↪ [GitHub Repository](#)

Built an NLP-based machine learning pipeline for automated toxic comment detection.

Highlights

- Text preprocessing
 - Feature engineering
 - Machine Learning
 - Classification models
 - Performance evaluation
-

Data Science Projects

Air Quality Confidence Interval Analysis (Python)

↪ [GitHub Repository](#)

- Applied statistical techniques to analyze environmental datasets and visualize confidence intervals using Python.

Sea Surface Temperature Contour Plot

↪ [GitHub Repository](#)

- Processed NetCDF climate datasets and visualized global sea surface temperature using scientific visualization techniques.

Tableau Dashboards

Built interactive dashboards including:

- Lightning Strike Analysis
- Seoul Bike Rental Analysis

EDUCATION

Sudan University of Science and Technology

Bachelor of Computer Science

Graduated: July 2026

Second Class – Division One

GPA: 2.93 / 4.00

CERTIFICATIONS

- Google Advanced Data Analytics Professional Certificate (2025)
- Google Data Analytics Professional Certificate (2023)
- Google Digital Marketing & E-Commerce Certificate (2024)
- IBM Python for Data Science (2023)
- Google Project Management Certificate (2024)

ACHIEVEMENTS

- **IEEEExtreme Programming Competition**
Top 5 National Ranking — Sudan
Recognized among the highest-ranking teams in Sudan during the international IEEEExtreme programming competition.
- **Academic Excellence Award**
Sudan University of Science and Technology
Awarded for outstanding academic performance.

OPEN SOURCE & CONTINUOUS LEARNING

- Building AI-powered production systems using modern software engineering practices.
- Continuously expanding expertise in Generative AI, LLM applications, backend architecture, and intelligent automation.
- Active GitHub user with projects covering AI, machine learning, backend engineering, and data analytics.

LANGUAGES

- Arabic — Native
 - English — Professional Working Proficiency
-
