

Amjad Nazar

Artificial Intelligence & Machine Learning Engineer

Email: amgadnazar11@gmail.com

Contact: +971527806036

Address: Dubai, UAE

LinkedIn: www.linkedin.com/in/amjad-nazar

Portfolio: <https://amgadnazar.github.io/>

PROFESSIONAL SUMMARY

Artificial Intelligence Engineer with practical experience building production-ready AI systems powered by Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), and scalable backend architectures.

Experienced in developing intelligent AI assistants, conversational AI platforms, REST APIs, semantic search pipelines, and modern backend systems using Python, FastAPI, Google Gemini, PostgreSQL, and Supabase.

Strong foundation in Machine Learning, Backend Engineering, and Data Analytics with experience delivering AI solutions that automate business workflows, improve customer engagement, and support intelligent decision-making.

Passionate about building scalable AI products that bridge software engineering, machine learning, and enterprise automation.

CORE COMPETENCIES

Artificial Intelligence, Generative AI, Machine Learning, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), Conversational AI, Prompt Engineering, Backend Engineering, Intelligent Automation, Backend Engineering, FastAPI, REST APIs, Software Architecture, AI Product Development, Data Analytics, Business Intelligence, Cloud API Integration.

TECHNICAL SKILLS

Artificial Intelligence: Python, Machine Learning, Google Gemini API, Large Language Models (LLMs), LangChain, Prompt Engineering, Retrieval-Augmented Generation (RAG), Natural Language Processing, Conversational AI, Semantic Search, Sentence Transformers.

Backend Engineering: Python, REST APIs, FastAPI, HTTPX, Pydantic, API Integration, Modular Architecture.

Databases: PostgreSQL, Supabase, Firebase.

Data Analytics: Pandas, NumPy, Scikit-learn, Statistical Analysis, Tableau, Power BI, Excel, Statistical Analysis.

Programming: Python, SQL, Java, JavaScript, HTML, CSS, Node.js, React Native.

Developer Tools: Git, GitHub, VS Code, Postman, Jupyter Notebook.

PROFESSIONAL EXPERIENCE

AI Engineer

ITX

2026 – Present

- Building AI-powered software solutions using Python and FastAPI.
- Developing production-ready AI services integrating Large Language Models.
- Designing scalable backend APIs for intelligent automation.
- Contributing to Retrieval-Augmented Generation (RAG) applications and modern AI workflows.

Information Technology Trainee

Bank of Khartoum

MAR 2023 – June 2023

- Supported enterprise IT operations and technical infrastructure.
 - Assisted in database maintenance and system troubleshooting.
 - Improved operational efficiency through scripting and automation.
 - Maintained internal technical systems and documentation.
-

FEATURED PROJECTS

AI Medical Assistant Platform

Production-ready Healthcare AI Platform

Python • FastAPI • Google Gemini • Supabase • PostgreSQL • RAG • WhatsApp Cloud API

🔗 [GitHub Repository](#)

Production-ready AI healthcare platform that automates patient communication through WhatsApp using conversational AI, semantic retrieval, and intelligent backend workflows.

Key Achievements

- Designed scalable modular architecture.
 - Built Retrieval-Augmented Generation pipeline.
 - Integrated Google Gemini AI.
 - Developed conversation memory and patient profile extraction.
 - Implemented intent-based workflow management.
 - Built appointment management workflows.
 - Integrated Meta WhatsApp Business Cloud API.
 - Optimized AI routing to reduce unnecessary LLM usage.
 - Designed SaaS-ready backend architecture.
-

AI Hotel WhatsApp Assistant

Python • FastAPI • Google Gemini • LangChain • ChromaDB • Supabase • Node.js

Designed and developed a production-oriented AI concierge platform enabling hotel guests to interact with hotels through WhatsApp using conversational AI and semantic search.

🔗 [GitHub Repository](#)

Key Achievements

- Designed the end-to-end software architecture.
 - Developed modular FastAPI backend services.
 - Integrated Google Gemini for conversational AI.
 - Built Retrieval-Augmented Generation (RAG) pipeline.
 - Implemented semantic search using ChromaDB and Sentence Transformers.
 - Designed hotel knowledge retrieval workflows.
 - Built guest profile and reservation management.
 - Developed REST APIs for AI communication.
 - Designed PostgreSQL schemas using Supabase.
 - Refactored a healthcare AI platform into a hotel concierge while preserving the architecture and backend workflow.
-

Hospital Administration Dashboard

React • TypeScript • Tailwind CSS • FastAPI

Designed a responsive administration dashboard for managing patients, appointments, AI conversations, analytics, healthcare providers, and operational data.

Toxic Comment Classification

Python • Scikit-learn • Natural Language Processing

Developed a machine learning pipeline for toxic text detection using NLP techniques, feature engineering, and classification algorithms.

Data Analytics & Business Intelligence

Developed multiple analytics projects using Python, SQL, Tableau, and Power BI, including:

- Banking Analytics Dashboard
 - Marketing Analytics Dashboard
 - Lightning Strike Analysis
 - Seoul Bike Rental Dashboard
 - Air Quality Statistical Analysis
 - Sea Surface Temperature Visualization
-

EDUCATION

Sudan University of Science and Technology

Bachelor of Computer Science

Graduated: July 2026

Second Class – Division One

GPA: 2.93 / 4.00

CERTIFICATIONS

- Google Advanced Data Analytics Professional Certificate (2025)
 - Google Data Analytics Professional Certificate (2023)
 - Google Digital Marketing & E-Commerce Certificate (2024)
 - IBM Python for Data Science (2023)
 - Google Project Management Certificate (2024)
-

ACHIEVEMENTS

- **IEEEExtreme Programming Competition**
Top 5 National Ranking — Sudan
Recognized among the highest-ranking teams in Sudan during the international IEEEExtreme programming competition.
 - **Academic Excellence Award**
Sudan University of Science and Technology
Awarded for outstanding academic performance.
-

OPEN SOURCE & CONTINUOUS LEARNING

- Published production-ready AI platforms on GitHub covering healthcare, hospitality, machine learning, and analytics.
 - Experienced in building AI systems that integrate LLMs, semantic retrieval, REST APIs, and scalable backend architectures.
 - Continuously learning Generative AI, AI Agents, backend engineering, cloud-native development, and enterprise AI solutions.
-

LANGUAGES

- Arabic — Native
 - English — Professional Working Proficiency
-
